Do You See a Non-VA Health Care Provider?

VLER Health may benefit you! VLER Health is a program that shares certain parts of your Veteran's health record between the Department of Veterans Affairs (VA), the Department of Defense (DoD) and selected private health care providers over a secure network known as the eHealth Exchange (eHE). This program is **free** and voluntary for the Veteran.

How might VLER Health benefit me? Many Veterans receive a portion of their care from non-VA health care providers. Sharing certain parts of your electronic health record (EHR) will help reduce the need for patients and families to carry records between health care providers. It also will allow your private health care provider to make informed decisions about your care.

What parts of the record will be shared? Health care providers will see a list of health problems, allergies, medications, vital signs, immunizations, and some laboratory test results. While we cannot share the entire health record, more information will be shared as the program grows, including doctor's notes, discharge summaries, etc.

How do I join? Signing up is fast and easy. You may sign up in person, through the mail, or online.
